5th July 2024

Dear Ms Parr,

**RE: PPC Permit MP3036SS, Variation LP3630MR – Whitehall Landfill
Quarterly Review Report – condition 4.2.2**

As required by the condition 4.2.2, this review of monitoring data covers the quarter commencing 17th March 2024.

Results of the monitoring conducted in this quarter are presented in the attached spreadsheet.

The results for BH1 in April were made non-reportable as it was found the technician had not purged the borehole before sampling.

There were two breaches of the methane limits at GM8 and GM10 in May. A schedule 6 report was sent at the end of May for these breaches.

Graphs of carbon dioxide have been made available for the perimeter gas wells.

No significant amounts of methane were detected in the perimeter gas monitoring.

Gas data has also been provided for the in waste gas locations (GF01 to GF11).

Should you have any further questions regarding this matter, please do not hesitate to contact me.

Yours sincerely,

Annette Symonds
