## Tell us about the site

If you have more than one facility on the site, you need to give us the national grid reference for each facility.

The site means all the land the facility occupies.

## Upload your site plan

Check that your site plan is what we need (opens in a new tab).

We will treat the site boundary as the boundary of the activities unless there is a defined area within this on the site plan which clearly shows where the permitted activities are to take place. This may be important to you if your proposed activities only occupy a small portion of a larger site.

| <b>Waste activity name</b>                                | Soil Recycling / Recovery Activity   |
| <b>Describe the waste activity</b>                        | Waste soil recycling/recovery activity via physical methods, including screening and associated handling of material. The purpose of the activity is to make recovered non-waste aggregate from waste soils, in order to preserve natural resources. |
| <b>Disposal and recovery codes</b>                        | R3, R5, R13  |
| <b>Hazardous waste treatment capacity (if it applies)</b> | NA   |
| <b>Non-hazardous waste treatment capacity</b>             | 136.99 tonnes  |

## Tell us about the total storage capacity

By 'total storage capacity', we mean the maximum amount of waste, in tonnes, you are able to store on the site at any one time

**Total storage capacity of non-hazardous waste** 20,000

**Total storage capacity of hazardous waste** NA

**Total annual throughput in tonnes per year** 50,000

## Tell us about the type of waste you will accept on site

Give the List of Wastes catalogue code (opens in a new tab) and description e.g. 06 01 02, Hydrochloric acid

Your document must include a description of any wastes ending in 99.

## Did the technical guidance note or H1 assessment show that odours are an important issue?

Select

No

## If you think that odour is unlikely to be a problem

If you think that odour is unlikely to be a problem from your activities, briefly describe why

The proposed wastes to be received at the facility for processing at the site are very unlikely to be a significant source of odour. The low or negligible organic content results in negligible landfill gas generation and no production of malodorous leachate or smell.

## Did your technical guidance note or H1 assessment show that noise or vibration are important issues?

Select

No

## If you think that noise is unlikely to be a problem

If you think that noise is unlikely to be a problem from your activities, briefly describe why

The site is located within an active sand and gravel quarry. As the proposed activity will use the same/similar plant and machinery to what is already used within the quarrying operation. Therefore, noise emissions produced by the proposed activity are unlikely to have any more impact on receptors than those already produced by the processes involved in the quarrying process. A number of mitigation measures will also be in place, as detailed within the Environmental Risk Assessment (K0642-ENV-R002), including the enhancement of an existing bund along the eastern boundary of the site, screening the noise from the processing area and the potential noise receptor.

## Did our fire prevention guidance or your H1 assessment show that fire risk is an important issue?

|        |
|--------|
| Select |
| No     |

**If you think that fire risk is unlikely to be a problem**

|  |
|--|
| If you think that fire risk is unlikely to be a problem from your activities, briefly describe why   |
| Wastes to be accepted at the facility will have low organic content and are inherently non-combustible in nature. Other mitigation measures have been detailed in the Environmental Risk Assessment. |

**Give information for clinical waste**

**Tell us if the waste operation/s could involve releasing any substance into water**

Could the waste operation or installation involve releasing any substance into any of the following?

None

## Tell us about any relevant offences

You must tell us if a relevant person has been convicted of a relevant offence. A relevant person is you, or anyone connected to the permit holder.

Find out about relevant convictions for waste and installations environmental permits - GOV.UK (opens in a new tab)
