Environmental Permitting (England & Wales) Regulations 2016

**Radnor Hills Mineral Water Company
Limited**

**Radnor Hills
Heartsease
Knighton
Powys
LD7 1LU**

Variation number

EPR/AB3697CN/V004

Permit number

EPR/AB3697CN

Radnor Hills

Permit number EPR/AB3697CN

Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

Radnor Hills Mineral Water Company Limited have applied for a variation to allow the addition of a ferric chloride dosing system. The purpose of the ferric chloride dosing system is to reduce the phosphate through precipitation of the phosphate (as a result of the reaction between the iron) and removal of the solid precipitate using an ultrafiltration membrane. The sludge/precipitate is disposed of using existing sludge disposal methods. This method of removing phosphates is a recognised best available technique (BAT) in the BAT conclusions for food, drink and milk industries.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application PAN-000849 received (EPR/AB3697CN/A001)	Not Duly Made 04/11/16	Application for mineral water bottling plant and associated effluent treatment plant.
