Zone of Theoretical Visibility (ZTV) for the proposed turbine array areas, based on a maximum blade tip height of 325.5m above sea level, calculated from indicative WTG Locations. ZTV calculated with a viewer height of 1.8m using a Digital Terrain Model based on OS Terrain 5, which does not take account of the screening effects of vegetation, buildings or other structures. Points not covered by OS Terrain 5 data were given a height of 3.83m (High Astronomical Tide).
