

LEGEND

- Liyr Offshore Project Boundary
- Liyr Array Area
- Liyr Indicative Turbine Locations
- Study Area 45km
- 12 Nautical Mile UK Territorial Limit
- Existing Projects
- Consented Projects
- Liyr Project Theoretically Visible
- Existing and Consented Projects Theoretically Visible
- Liyr, Existing and Consented Projects Theoretically Visible

NOTES

Spatial Reference
Name: WGS 1984 UTM Zone 30N
GCS: GCS WGS 1984
Datum: WGS 1984
Projection: Transverse Mercator
Map Units: Meter

Correct at time of data issue, not maintained. Not prejudicial to delimitation.

Zone of Theoretical Visibility (ZTV) for the proposed Liyr turbine array areas, based on a maximum blade tip height of 325.5m above sea level, calculated from Indicative WTG Locations. Zone of Theoretical Visibility for Castle Pill is based on a maximum blade tip height of 76m calculated from published turbine locations. Zone of Theoretical Visibility for Lower Scoveston is based on a maximum blade tip height of 77m calculated from published turbine locations. Zone of Theoretical Visibility for Scoveston Park is based on a maximum blade tip height of 79.6m calculated from published turbine locations. Zone of Theoretical Visibility for Ware Point is based on a maximum blade tip height of 105m calculated from published turbine locations. Erebus is based on a maximum blade tip height of 270m calculated from published turbine locations. ZTV calculated with a viewer height of 1.8m using a Digital Terrain Model based on OS Terrain 5, which does not take account of the screening effects of vegetation, buildings or other structures. Points not covered by OS Terrain 5 data were given a height of 3.83m (High Astronomical Tide).
