4. Details of our assessment

On the 8th of August 2024, NRW were notified of a sample exceedance for Chirk Fishery in relation to the suspended solids value at the outlet exceeding the suspended solids value at the intake by 5mg/l as per the permit. This sample was taken on the 30th of May 2024.

Inlet Unit	Outlet Unit
6 mg/l	11.5 mg/l

Chirk Fishery explained that they had experienced heavy rain in the previous days, causing the river to be in spate which then takes a while to filter through the pond system.
