**Report sent to:** Peter Jones, Permit Holder, on 11/09/2024.

### 1. Summary of our findings (full details in section 4)

Part of permitted activity assessed (criteria)	Assessment result	Permit condition
WQ-B2 - Water Quality - Operations - The site	Assessed (A)	

Result types are explained in more detail in the 'Important Information' section below.

### 2. What action is required?

No action required.

### 3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

### 4. Details of our assessment

I was unable to locate the precise discharge location due to relatively steep terrain and presence of vegetation. However, the watercourse (where water was visible) appeared clear and free from pollutants. No smell of sewage was detectable.

The site was locked and not in use at the time of my visit. There appeared to be an alarm sounding, and its possible this was coming from the sewage treatment system. Please investigate this alarm and take any steps necessary to resolve any problems.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.
