Dudodyn Renewal

Is this proposal as a result of a Restoring Sustainable Abstraction programme or other work remediation work, to prevent and reduce environmental damage requested by us?

No

Are you making this application as part of an agreement to trade water rights? Water rights trading is where a Licence Holder sells all or part of their abstraction licence rights, permanently or temporarily, to another person.

No

Provide details below

This is a simple, same terms renewal.

Use this section to show us how you have calculated the amount of water you require. This should include details of your operational regime (for example, number of hours and days you intend to abstract, number of units produced or area to be irrigated). We use this information to determine if the volumes you propose to abstract are appropriate for the purpose. Depending which industry you are in, you may need to provide additional information below.

If your water usage has been lower than your licensed volumes, you will need to provide additional information to demonstrate your continued need for the water, for example, additional justification or a Business Case.

The water is for a hydropower scheme.

Maximum instantaneous flow (Design flow): 209l/s

Max hourly abstraction (Design flow x 3600 sec): 209l/s x 3600s = 752.4cubic metres

Max daily abstraction (Max hourly abstract x 24h): 752.4cubic metres x 24h = 18,057.6cubic metres

Max annual abstraction (Max daily abstract x 365 days): 18,057.6cubic metres x 365 = 6,611,034 cubic metres

	% abstraction and zone applied for	Average gradient of depleted reach (%)	Catchment size above abstraction point (kilometres squared)	Net head between abstraction and discharge points (metres)

State the length of depleted reach (in metres)

As existing licence

Provide the flow data (in cubic metres per second) & ratios specified below:

Q95 As existing licence

Q10 As existing licence

Qmean As existing licence

What is the ratio of Q95:Qmean? As existing licence

What is the ratio of Q10:Qmean? As existing licence

What low flow protection (Low flow protection is the flow rate above which abstraction can begin and is separate to the abstraction % take) do you propose to maintain in the depleted reach when the hydropower scheme is operating (in m³/s)?

As existing licence

Provide details of what measures you provide to ensure efficient use of water. This could include water storage, re-use or recirculation, monitoring and checking for leaks, undertaking water audits or other industry specific good practise.

A high efficiency turbine and generator is being used.
