## 2. What action is required?

No action required.

## 3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

### **At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

## 4. Details of our assessment

### Llwyn y Gaer poultry unit site inspection

Peter Jones attended the site on Tuesday 25 September 2024 and met with the site manager.

To remind the operator, following each assessment Natural Resources Wales will produce a Compliance Assessment Report (CAR) detailing our comments from the audit. If we substantiate reasonably foreseeable risks or actual impact to the environment, we can breach the business against your permit conditions. This can affect your site banding and annual subsistence fees; scored on a Category 1 - 4 basis:

- 1 - Major, serious persistent and/or extensive impact on the people/property/environment
- 2 - Significant impact or effect on the environment/people/property
- 3 - Minor impact or effect on the environment/people/property
- 4 - A non-compliance which has no potential environmental effect

### Site Report

The inspection involved of visual inspection of infrastructure and drainage and a review of documents required under the permit conditions.

A visual inspection of the yards surrounding the sheds was made with concentration on state of the concrete surfaces and drainage. There were no issues identified with roof and yard drainage or the drainage used to divert dirty wash water to collection tanks during cleaning.

The site was clean and tidy and there were no reports of noise or odour complaints.

Currently all of the poultry litter is being removed by Gamba growers and as directed by Avara poultry litter is not being used as a fertilizer in the Wye and Usk catchments.

Following the site inspection, the officer proceeded to the site office to inspect documents required under the permit conditions, these were all in order and available for inspection. The inspection centred around the BAT conclusion replies submitted to Natural Resources Wales earlier in 2021 as a permit requirement. There were no issues with these, and the BAT techniques being carried out were approved.

## Important information

### Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

### Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

### How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

**If your assessment result in Section 1 is suspended, what does this mean?**

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
