Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation adds a 990 kWth biomass boiler to the permit. The boiler is fuelled on both virgin wood and Grade A recycled wood that has been processed to PAS 111:2012. The boiler fuel rate is 255 kg/hour. As such the boiler is classed as a small waste incinerator plant under Section 5.1 Part B(v) of Part 2 Schedule 1 of the Environmental Permitting (England and Wales) Regulations 2016. The boiler is below 1 MWth net rated thermal input and therefore is not subject to the requirements of the Medium Combustion Plant Directive (MCPD).

It also reclassifies another biomass boiler – which was previously included in the permit as a Directly Associated Activity – to an EPR Section 5.1. SWIP for the same reasons as outlined above. This boiler has a net rated thermal input of 995 kW and has a fuel rate of 255 kg/hour. It is also does not meet the capacity threshold for MCPD.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
