

Apply for screening and/or scoping under the Marine Works (Environmental Impact Assessment) Regulations 2007

Project Details

Project name

Fishguard Replacement Linkspan

Please Provide a brief description of the proposed project, including location

The application site is located within Goodwick/Fishguard, Pembrokeshire (central grid reference 195171.227: 238812.970).

The site is a parcel of land spanning an area of approximately 36 hectares of the harbour, to include the existing linkspan, hinterland and within the bayforeshore.

Stena wish to replace their existing temporary arrangement of a linkspan and jack up barge and provide a replacement pontoon to allow safe berthing of the ferry at Fishguard in the long term.

Stena own a floating pontoon which they wish to relocate to Fishguard. Civils works will be required to enable access and utilisation of the pontoon for the ferry traffic, to include land reclamation and rock armour revetment construction. Landside works will be required to adjust traffic and pedestrian routes to service the new floating pontoon. Dredging works are also proposed, these cover maintenance dredging of the berth, capital dredge of the navigation channel and beneath the pontoon to allow sufficient depth, and soft material removal to allow construction of the reclaimed area.
