

NOTES

1. Verifying Dimensions.
The contractor shall verify dimensions against such other drawings or site conditions as pertain to this part of the work.
2. Existing Services.
Any information concerning the location of existing services indicated on this drawing is intended for general guidance only. It shall be the responsibility of the contractor to determine and verify the exact horizontal and vertical alignment of all cables, pipes, etc. (both underground and overhead) before work commences.
3. Issue of Drawings.
Hard copies, dwf and pdf will form a controlled issue of the drawing. All other formats (dwg, dxf etc.) are deemed to be an uncontrolled issue and any work carried out based on these files is at the recipient's own risk. RPS will not accept any responsibility for any errors arising from the use of these files, either by human error by the recipient. Listing of un-dimensioned measurements, compatibility issues with the recipient's software, and any errors arising when these files are used to aid the recipient's drawing production, or setting out on site.
4. Equipment will be stored in the site compound within the port (or alternatively off site) and brought to the port via road or sea. The vehicle route is via local roads, specifically the A40 which meets the internal port roads at Fishguard Harbour entrance. The contractor will use the internal port roads both the public and secure areas to reach the work site if operating from land or to reach the internal site compound.
5. It is anticipated that smaller workboats and vessels would use the local Goodwick Slipway to enter the water and travel to the site. This is located behind the Sea Trust - Ocean Labs Aquarium car park off the A40. For vessels arriving from sea the originating port will be determined by the appointed contractor
