Licence Holder:	Penllergaer Estate Limited
Address:	Druslyn House, De La Beche Street, Swansea, SA1 3HH
Contact:	Ian Howell, Rees Richards.
Contact Email:	ian@reesrichards.co.uk

COMMENTS

A)	For HAF calculation the separate efficiencies of the listed elements has not been determined. The overall efficiency of the system based on net dynamic head at peak flow is greater than 75.0%. This is the figure that has been used in the return.
B)	Since commissioning the weekly Total Generation Meter readings have been taken on the Friday of each week. The newly issued NRW return form requests weekly data for each Sunday. For this reporting period the recorded Friday reading for each week has been marked on the return as a Sunday reading. At this late stage this will be the same for the 2018/19 return. From the 1st April 2019 onwards weekly readings will be recorded on Sunday of each week
C)	The start 1st April 2017 reading was extrapolated from the readings each side.
D)	The end 31st March 2018 was taken as the weekly 1st April 2018 reading. This will also be used as the 1st April 2018 reading in the next return period.
