Ref: PPC Permit No.: BJ6968

Dear Elizabeth, Please find attached: **IQE Silicon Compounds Monitoring Returns Forms**

A1 – HCl Releases to Air

Find enclosed

All tests were carried out in accordance with BS EN 1911-1:1998 by SOCOTEC (MCERTS
Registration No.: MM 02 126 & MM 02 081)

A2 – Release to Air

Find enclosed.

H1 Model – Releases to Air

As discussed with Lewis Evans on the 27th of March 2023 the requirement for this has expired and no longer requires completion. The initial requirement from the permit variation in 2008 after the removal of resin absorption nits at emission points A1 – A6. This was erroneously kept as a requirement after initial submission.

E1 – Environmental Releases from energy usage

Find enclosed. The form has been changed to the E1 form used for both NP and EU. The old document wasn't superseded by new form in the past. It also keeps information to what has been requested in the permit along with the CO₂/in₂ wafer that the CCA requires us track.

S1 – Releases to Sewers

Find enclosed.

Fugitive Emissions 2022

There are no fugitive emissions to report.

If you require any further information or clarification then please contact me.

Regards

Senior HSE Lead.
