Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the surrender in part of an environmental permit.

Protium Green Solutions Limited have applied for a partial surrender to reflect that the hydrogen production facility had moved location. Changes to the layout of the hydrogen production facility meant that the site plan no longer reflect the area where the activity is occurring. The new land is being added in a separate variation (V003).

The partial surrender is to remove the portion of land to the west of the site. The activity never operated in this area and the land is no longer required.

Any changes made as a result of the part surrender are set out in the schedules.

The status log of a permit sets out the permitting history, including any changes to the permit reference number
