Air 1 / 06/06/2023**Reporting of emissions to air for the period from 01/01/2023 to 31/12/2023**

Emission Point	Substance / Parameter	Emission		Result ^[1]	Test Method ^[2]	Sample Date and Times ^[3]	Uncertainty ^[4]
		Limit Value	Reference Period				
[A1-A60]	Carbon Monoxide	No limit set	In line with web guide: Monitoring stack emissions: low risk MCPs and specified	See rows below	Representative engine monitoring In line with web guide: Monitoring stack emissions: low risk MCPs and specified generators	See rows below	See rows below
Rows to be completed by operator according to engine results reported							
A1-A60				No monitoring carried out in this period			

- [1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values.
- [2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with Natural Resources Wales is used, then the appropriate identifier is given. In other cases the principal technique is stated, for example gas chromatography.
- [3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.
- [4] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.
