Entitlement to apply (not required for impoundment licence applications)

Does the applicant have a legal right of access to the point of abstraction?

Owner

Site map showing abstraction points

- File: Map of Feeder Location-Abstraction Point NantCarn Brook.jpeg - [Download](#)
- File: Feeder Row Canal Feed.pdf - [Download](#)

For abstraction licence applications where you are the landowner, provide a map with the land boundary and all abstraction and discharge point(s) marked.

Please tick here to show that you have done this.

Pre-application number

Have you undertaken a pre-application enquiry or had any previous discussions with us?

Yes

Provide reference number or staff member's name

WPCC13468

Remediation work

Is this proposal as a result of a Restoring Sustainable Abstraction programme or other work requested by us?

No

Source of supply

State where you intend to abstract from

Surface Water. e.g. Stream, leat, spring

Provide a 12 digit National Grid Reference for the proposed or existing abstraction or impoundment point (e.g. ST 19057 76826)

ST 22182 93494

Source of supply (name of watercourse or aquifer)

Nant Carn Brook

Site name / reference
(e.g. Tŷ Mawr Farm)

Pontywaun

Proposal summary

Please provide an outline of your proposal, including any sketches.

As a guide, you should include: a description of the activities which (will) take place at your site, the means of abstraction/impoundment proposed, if the proposal is related to another licence or permit (i.e. an Environmental Permit to Discharge Water) and details of any survey work undertaken. For changes to existing licences, summarise the changes proposed. Sketches or photographs that will aid our understanding of your proposal can be uploaded below.

Context/History

Primary feed leads to the Ebbw River via. a 1.8 m dia. culvert so the proposal is for water abstraction from the Nancarn Brook to the Canal via. the secondary 450 mm dia. pipe as summarised in the attached Report and shown on drawing (Feeder Row Canal Feed.pdf) - this is an existing culverted arrangement that has been in place since the 1970s. The Penstock control is in the first chamber outside the brook where the feed is switched off in October and on in March each year.

Proposal

As per report the investigation and analysis has found that we are to reduce the bed level by 184 mm to ensure abstraction does not take place below the Q75 level for each annual rainfall year.

OWC and Byelaws applicable with LLFA
