Operator's comments :

The process was operated for only 1 week of the reporting period prior to being 'idled' for reasons of high energy costs, disadvantaging Liberty Steel and the inability to compete internationally against imports produced with lower energy costs and lower environmental impacts. It is the intention of the operator to return to production as soon as conditions allow.

Operator's comments:

The process was operated for only 1 week of the reporting period prior to being 'idled' for reasons of high energy costs, disadvantaging UK Steel producers, and the inability to compete internationally against imports produced with lower energy costs and lower environmental standards. It is the intention of the operator to return to production as soon as conditions allow.

Due to extreme low production levels, in the main, water was used for welfare purposes only. There was no requirement for grey water.
