Use this section to show us how you have calculated the amount of water you require. This should include details of your operational regime (for example, number of hours and days you intend to abstract, number of units produced or area to be irrigated). We use this information to determine if the volumes you propose to abstract are appropriate for the purpose. Depending which industry you are in, you may need to provide additional information below.

If your water usage has been lower than your licensed volumes, you will need to provide additional information to demonstrate your continued need for the water, for example, additional justification or a Business Case.

State the length of depleted reach (in metres)

As existing licence.

Provide the flow data (in cubic metres per second) & ratios specified below:

Q95 As existing licence.
Q10 As existing licence.
Qmean As existing licence.
What is the ratio of Q95:Qmean? As existing licence.
What is the ratio of Q10:Qmean? As existing licence.

What low flow protection (Low flow protection is the flow rate above which abstraction can begin and is separate to the abstraction % take) do you propose to maintain in the depleted reach when the hydropower scheme is operating (in m³/s)?

As existing licence.

Provide details of what measures you provide to ensure efficient use of water. This could include water storage, re-use or recirculation, monitoring and checking for leaks, undertaking water audits or other industry specific good practise.

A high efficiency turbine and generator is being used.
