Hafren Dyfrdwy Impoundment Licence Applications, Afon Cownwy (ref: PPN-00211) and Afon Marchnant (ref: PPN-00212)

Dear Alex Lorenz,

Hafren Dyfrdwy is the statutory authority for the drinking water supply assets at Vyrnwy, which includes responsibilities for the impoundment and abstraction systems at the Afon Marchnant and Afon Cownwy.

We are currently acting as Client through the framework contract project proposed for modifications of the impoundment structures, designed to improve the watercourses in line with the Water Framework Directive.

NMCN limited are our Framework partner for this project, and have procured the services of Atkins for the detailed design stage that you are currently working through.

Within these services, I hereby confirm that it is part of Atkins brief to submit the two impoundment licence applications for the proposed modifications at each of the above river abstraction points on behalf of Hafren Dyfrdwy

Please include this letter within the Impoundment Licence Application to confirm this to National Resources Wales,

Yours Sincerely
