Tell us about the work

What is the project title?

Connah's Quay Power Station flood valve

Briefly describe what you want to do

We are currently looking to implement a works programme to clean / investigate a tidal flap valve (picture attached for reference). The drainage run discharges into the River Dee, adjacent to Deeside Substation just south of A548 Flintshire Bridge. Given the age and lack of maintenance due to it being largely inaccessible, it is likely that the valve is not operating as intended and allowing river water back into the drainage system and causing problems upstream.

The plan is to install a safe working platform that extends out to the tidal flap, for us to access during low tide to clean (via a jetting lance from a tanker. Washings to be controlled and uplifted onto tanker) and investigate. We will be getting photographic evidence and dimensions should the valve require replacement (it is likely it will and this will then be considered for phase 2 works).

When do you want the licence to start?

Band 1 licences are typically issued for one year, subject to consultation.

Make sure the date you provide is on or before the day you want to start carrying out the work.

Licence start date 03/03/2025
