List the condition(s) of your marine licence

List the condition(s) of your marine licence that you are looking to discharge, including any monitoring reports. Please include the condition number and condition text.

Condition 3.15 The Licence Holder must submit a device specific Navigational Risk Assessment (NRA) for written approval at least 8 weeks prior to any deployment operation.

Condition 3.17 The Licence Holder must also submit device specific ERCoP for written approval at least 8 weeks prior to any device deployment operation.

Condition 3.20 The Licence Holder must also submit device specific Environmental Management Plan (EMP) to the Licensing Authority for written approval at least 3 months prior to device deployment.

Condition 3.29 The Licence Holder must submit a monitoring report following completion of any surveys detailed within the predeployment monitoring plan (3.28) to the Licensing Authority at least 3 months prior to commencement of activities.

Condition 3.30 The Licence Holder must submit a Device specific Installation and Operation Method Statement (DIOMS) to the Licensing Authority for written approval.

Please provide a description of your request e.g. Construction Environment Management Plan submitted for approval prior to commencement of works/ submission of annual monitoring report for approval

In compliance with the ORML1957v2 consent conditions detailed above the following documents are being submitted for approval:

META C-GEN Device Specific Navigational Risk Assessment (NRA) for approval (Condition 3.15)
META C-GEN Device Specific ERCoP DID (Developer Information Document) for approval (Condition 3.17)
META C-GEN Device Specific EMP for approval (Condition 3.20)
META C-GEN Predeployment Monitoring Plan Report for approval (Condition 3.29)
META C-GEN Device Installation and Operation Method Statement (DIOMS) (Condition 3.30)

Please note this project is very similar to recent tidal energy deployments at the META Warrior Way site, specifically the Porpoise Power deployment in February 2025 and the Swansea University deployments in 2023 and 2024 respectively. It is the same floating structure and mooring arrangement in the same location within the site. It is also the same Swansea University tidal turbine that is being used to capture the power. The novel addition to this deployment is the C-GEN electrical generator which is an 800mm sealed unit which will be attached to the turbine shaft and used to convert the power captured by the tidal turbine into electricity which will be consumed onboard the device.

Due to the similarities to recent deployments at the Warrior Way site the documentation submitted as part of this application is also very similar to what has been approved previously.
