At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

We inspected the site on Wednesday 5th February at 1200, the weather was dry and there were no guests staying at the campsite at the time of the visit.

The drainage field was inaccessible from the site but was confirmed to be at the NGR specified on the permit, you informed us that you have had no issues with the field. The pipework running between the package treatment plant and the drainage field appeared in good order and the inside of the pipe was clean and clear of debris.

We inspected the first two chambers of the treatment plant, both of which appeared to be clean and in good working order, you informed us that the third chamber was inaccessible at the time as brush cuttings had been placed over the manhole.

You confirmed that the treatment plant is subject to an annual maintenance contract, with the last maintenance visit being in July 2024.

Thank you for your time.

END.
