Date: 14 August 2023

Dear Sir/Madam

Assessment of waste recovery plan

Application Reference: PPN-00856

Proposed Operator: Ash Resources Management (Cambrian Quarry) Limited

**Facility: ASH Resources Management (Cambrian Quarry) Ltd, Glyndwr Road,
Gwernymynydd, Mold, Flintshire, CH7 5LW**

Thank you for your waste recovery plan received on 01 August 2022. We have assessed it against the standards set out in the guidance – Depositing waste for recovery - [Natural Resources Wales / Depositing waste for recovery](#)

We agree that your activity is a recovery operation. This advice is based on the information provided in your waste recovery plan*.

If you change your waste recovery plan between now and when you submit an environmental permit application, this advice may no longer apply. You should tell us about the changes when you submit the application. Or, submit the amended plan for re-assessment before-hand.

Your variation application must include information on how the British Standard for topsoil, BS 3882:2015, will be met for those waste materials being used to create a topsoil layer. This may form part of your waste acceptance procedures. You should also refer to our guidance [Natural Resources Wales / Prepare a management system for a deposit of waste for recovery activity](#) when developing your waste acceptance procedures.'

*Please note: the approved 'waste recovery plan' consists of the initial submission and all amendments, additional information and correspondence sent to us as part of the assessment and on which we based our decision.

If you have any questions please contact your local compliance officer.

Yours sincerely

**Rhiannon Smith
Permitting Officer**
