

Compliance Assessment Report CAR_NRW0046464

Permit being assessed: GB3831AM.

For: Derwen Aggregates Ltd, **held by:** Derwen Aggregates Ltd

At: Neath Abbey Wharf, Neath, West Glam, SA10 6BL.

Type of assessment: Site Inspection,

Reason: Routine.

On: 20/02/2025 between 10:00 and 11:00.

Parts of permit assessed: W1, W2, W3.

NRW Lead Officer: David Morgan, accompanied by Edward Davies.

Report sent to: Stuart Hanford, Director, on 27/02/2025.

1. Summary of our findings (full details in section 4)

Part of permitted activity assessed (compliance criteria)	Assessment result	Permit condition
W1A - Waste - Management - General management	Assessed (A)	
W2A - Waste - Operations - Permitted activities	Assessed (A)	
W2C - Waste - Operations - Operating techniques	Assessed (A)	
W2D - Waste - Operations - The site	Assessed (A)	
W2E - Waste - Operations - Waste acceptance	Assessed (A)	
W3B - Waste - Emissions and monitoring - Emissions of substances not controlled by emission limits	Assessed (A)	
W3D - Waste - Emissions and monitoring - Noise and vibration	Assessed (A)	

Result types are explained in more detail in the 'Important Information' section below.

Total non-compliances recorded	Total non-compliance score
0	0

How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

A routine site inspection was undertaken on Thursday 20th February 2025. Present during the inspection were: David Morgan, Edward Davies (Natural Resources Wales) and Stuart Hanford (Derwen Aggregates Ltd).

The site inspection took place during a period of heavy rain which has implications on site surface water management. It is likely that Natural Resources Wales will conduct the next site inspection in the summer of 2025 when weather is expected to be dry. The focus of the next inspection will likely be dust management.

On Thursday 20th February 2025, the following observations were made:

Surface Water Management

The inspection took place during a period of heavy, sustained rain. On site, in operational areas, there was minor ponding of surface waters. This was assessed as having no impact on operations. Water, mud and run-off from soils was pooling, but surface water management and site drainage were deemed to be compliant.

At the time of the inspection, site surface water was draining to the onsite lagoon. The drainage lagoon was visually inspected and appeared to be functioning effectively. Surface water containing mud/silt was draining to the lagoon where solids appeared to be settling. The discharge from the lagoon was visually clear. The point at where the discharge takes place showed no signs of polluting matter leaving site.

We did discuss potentially sampling the discharge at some point to ensure no polluting materials (soils/silt etc.) were escaping site. **Please ensure that access can be made to the discharge point so a sample can be taken.**

Given the layout, volume & type of materials on site, surface water was being managed well and recorded as compliant with the Environmental Permit.

Waste Storage

An inspection of the site boundary was undertaken and in the far left corner of the site (upon entering) , materials were contained on site. The hedgerows and vegetation in this

area shows a clear border to the property and prevents escape of materials off site.

Waste aggregates were stored in various grades and there appeared to be very little/if any other construction & demolition wastes in the waste. Typically, this material can contain plastics, glass, wood, gypsum etc, but the waste stacks on site were free from visual contamination which suggests the recycling process on site is efficient and working well.

Dust Management

It is noted that a number of inspections have now taken place in typically wetter periods of the year. As the site manages significant volumes of soils and aggregates, it is likely that Natural Resources Wales' next inspection will take place during the summer where we will assess how Derwen Aggregates Ltd manages dust on site (dust suppression, dust mitigation procedures etc).

On 20th February 2025, there were no signs that dust, mud, debris was leaving site.

No non-compliances were recorded during the inspection.

Thank you for your time during the inspection.

END OF REPORT

Any compliance criteria not highlighted in the above summary should be considered as not assessed. In this document 'Natural Resources Wales' means the Natural Resources Body for Wales established by Article 3 of the Natural Resource Body for Wales (Establishment) Order 2012. You should note that the Natural Resources Body for Wales has been formed by bringing together the Countryside Council for Wales, Forestry Commission Wales and Environment Agency Wales. The Natural Resources Body for Wales has been empowered to exercise Welsh devolved functions since 1st April 2013 and has, generally, taken over the responsibilities of the Countryside Council for Wales, the Forestry Commissioners and the Environment Agency for Wales.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

If your assessment result in Section 1 is suspended, what does this mean?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.

Full list of Waste compliance criteria (used in section 1 and 2):

1. Management

- W1A – General management
- W1B – Energy Efficiency (MCP/SG facilities only)
- W1C – Avoidance, recovery and disposal of wastes produced by the activities

2. Operations

- W2A – Permitted activities
- W2B – Waste recovery plan
- W2C – Operating techniques
- W2D – The site
- W2E – Waste acceptance
- W2F – Technical requirements
- W2G – Improvement programme
- W2H – Pre-operational conditions

3. Emission and Monitoring

- W3A – Emissions to water, air or land
- W3B – Emissions of substances not controlled by emission limits
- W3C – Odour
- W3D – Noise and vibration
- W3E – Monitoring
- W3F – Pests
- W3G – Fire

4. Information

- W4A – Records
- W4B – Reporting
- W4C – Notification

Enforcement response

Any non-compliance with a permit condition is an offence and we may take legal action against you. Action we take can include prosecution, serving a notice on you and/or suspension or revocation of your permit. See our Enforcement and Sanctions Guidance for further information.

Data protection notice

You should make sure that anyone named in this report knows that the information it contains will be processed by Natural Resources Wales to fulfil its regulatory and monitoring functions and to maintain the relevant public register(s).

We may also use and/or disclose the report in connection with:

- offering or providing you with our literature or services relating to environmental matters
- consulting with the public, public bodies and other organisations (e.g. Health and Safety Executive, local authorities) on environmental issues
- carrying out statistical analysis, research and development on environmental issues
- providing public register information to enquirers
- investigating possible breaches of environmental law
- assessing customer service satisfaction and improving our service
- Freedom of Information Act or Environmental Information Regulations requests.

We may also pass it on to our agents or representatives to do these things on our behalf.

Disclosure of information – this report will be available to view on-line

If you think this report contains commercially confidential information that should not be placed on our public register, you must contact your local Natural Resources Wales office within **fifteen working days** of receiving this report, using the contact details in the accompanying email or letter. You must give a full explanation of why it should not be added to our public register, including specifying which information is commercially confidential. We will assess your request and respond to you within twenty working days to let you know if we agree to your request.

What do I do if I disagree with the report or have a complaint?

If you disagree with this compliance assessment report, you should contact the lead officer without delay to discuss your concerns.

If you are unable to resolve the issue with the lead officer or their line manager you should contact our Customer Contact team on 0300 065 3000 (Monday to Friday 08:00 to 18:00), or email enquiries@naturalresourceswales.gov.uk for details of how to raise your dispute further through our Complaints and Commendations procedure.

If you are dissatisfied with our response, you can contact the Public Services Ombudsman for Wales by phone on 0300 7900203 or by email at ask@ombudsman.wales

Welsh Language Standards

We are committed to establishing Natural Resources Wales as a naturally bilingual organisation. We will provide compliance reports in your preferred language.
