Tell us about the work

What is the project title?

Brockweir Bridge Resurfacing Works

Briefly describe what you want to do

The carriageway surfacing of Brockweir Bridge is in very poor condition, with significant areas of potholes, patching, and loose grit accumulation along the edges of the carriageway throughout the entire length of the bridge and its approaches. We plan to undertake resurfacing work and repair any minor surface-level concrete defects only in the carriageway area (verges not included), cleanse the deck drainage system from carriageway level, and replace the existing bridge expansion joints. Works will be carried out in a controlled environment, with a total closure of the bridge implemented during works and debris netting installed to parapets to encapsulate the works area.

When do you want the licence to start?

Band 1 licences are typically issued for one year, subject to consultation.

Make sure the date you provide is on or before the day you want to start carrying out the work.

Licence start date 06/06/2025

Tell us about your coordinates

We need to understand exactly where the work will happen through the coordinates you give us.

If you need to give us more than 10 coordinates, you must upload them in an Excel spreadsheet.

You can also upload a Shapefile if you have one.

None

How will you deliver materials to the site?

Select

Vehicle

Tell us about the route you will use to deliver materials to the site

We need to know how you will transport material from the site car park or compound to the location of the work.

Describe the delivery route

Construction materials will be transported to the bridge via tipper trucks or large goods vehicles by accessing the total closure. Minimal storage of materials on site will be required, as surfacing material will be laid as it arrives on site. Similarly, waterproofing and bridge expansion joint materials are stored in holding tanks on the trucks and are installed direct from these vehicles.

Which materials will you remove as part of your work?

Tick all that apply

Other (please provide a description of materials):

Existing surfacing and waterproofing material will be planed out and removed from site for safe disposal, Waste Transfer Notes to be in provided to evidence safe disposal.

Upload any construction plans and sectional drawings

For beach replenishment, show:

the quantity, particle size and source of material to be deposited deposit location
