Continuation Sheet

Page 2 of 2

6. The discharge shall not have any adverse effect on any source of water used for public or private potable supply.
7. As far as is reasonably practicable the works shall be operated so as to prevent any matter being present in the effluent which will cause the receiving water to be poisonous or injurious to fish, their spawn or spawning grounds or food, nor otherwise cause damage to the ecology of the receiving waters or have any adverse visual impact.
8. The works shall be operated and maintained in accordance with the manufacturer's instructions. In particular the works shall be maintained such that:-
 - a) it remains fully operational except at times of mechanical or electrical breakdown
 - b) any such breakdowns shall be attended to promptly and the equipment returned to normal operation as soon as possible
 - c) tanks shall be desludged at sufficient frequency and in such a manner as to prevent problems with septic sludge, rising sludge or excessive carry over of suspended solids.

This Consent is given on: 24th April 1992 on behalf of the Authority
by: T.A. Westwood Area Environmental Quality Manager

During the period ending with the: 25th April 1994 the terms of this
Consent will not be altered without the written agreement of the person
making this discharge
