**GREEN METAL SALVAGE LTD. UNIT6 MILLBROOK INDUSTRIAL ESTATE,  
LANDORE SWANSEA SA1 2NT**

**This Fire Prevention Plan (the 'Plan') has been produced in accordance with Natural Resources Wales, Fire Prevention & Mitigation Plan Guidance- Waste Management, (Guidance Note 16, Document Version 2.0, Document updated August 2017.)**

---

## **1.0 OBJECTIVES OF THIS FIRE PREVENTION PLAN**

### **1.1 Introduction**

This Fire Prevention Plan (the 'Plan') has been produced in accordance with Natural Resources Wales, Fire Prevention & Mitigation Plan Guidance- Waste Management, (Guidance Note 16, Document Version 2.0, Document updated August 2017.)

**A Fire Risk Assessment** was conducted on 9 July 2019, The purpose of this FRA is to provide an assessment of the risk to life from fire in the premises and where appropriate, to make recommendations to ensure compliance with above Guidance.

Green Metal Salvage Ltd (GMS) is seeking to become an authorised treatment facility (ATF) for End of Life Vehicles at its premises at Unit 6 Millbrook Industrial Estate, Swansea SA1 2NT (the 'Site'). When operational, the Site will be used to handle and de-pollute end-of-life vehicles.(ELV).

Initial consultation with the local Natural Resources Wales ('NRW') officers David Morgan and Sally Wakeford was undertaken in June 2019, during which time it was verbally confirmed that a Fire Prevention Plan was required for the Site.

This Plan will be part of the Site's management system but will be a standalone document that will be easily accessible to staff and contractors at all times. It will also be accessible to NRW (Natural Resources Wales) and Emergency Services upon request and during an incident. All staff and contractors working on Site will be made aware of the contents of this Plan so that they understand how to prevent a fire occurring and what to do if one breaks out.

The location of the Site is shown on Drawing 1 – Site Location Plan.

### **1.2 Objectives**

This Plan sets out the measures that will be used to reduce the likelihood and consequences of a fire incident at the Site. In this way, this Plan describes measures in order to facilitate the prevention of fires and for a fast and effective response in an emergency, the subsequent plan will be implemented and followed.

This document will form part of the site's Environmental Management Plan (EMP) held on site (the EMP is itself part of the wider EMS and the EMP is equivalent to the document formerly known as the site's ('Working Plan').
