Details should include, but not be limited to, dimensions of project, quantity of material being deposited and removed.

A new pontoon some 60m in length is proposed

It will be constructed with 11 or 12 interconnected pontoon modules from an Approved Supplier

The pontoons will rest in the sea bed at certain tidal levels

The access from the Holiday Park will be via an articulated gangway (bridge) which will deal with changes in level as the tide rises and falls

The structure will be held in place by up to 6 piles.

The pontoon will be attached to these and will slide up and down on them freely

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

6(b). Please detail the location of the proposed construction project.

This should be either Ordnance Survey National Grid Reference (i.e. AB 12345 67890) or Latitude and Longitude in decimal degrees to 4 decimal places (i.e. Lat 52.1234 Long - 4.1234), defining the extent of the project. **Please specify which coordinate system has been used.**

12(c). Please provide a description of all mitigation measures proposed to avoid any impact on designated conservation sites.

Piling may cause localised (around the hole) disturbance as will boreholes, but these will be undertaken at low water when the tide is out and land based plant can access the area, thus its considered very unlikley that this will cause issues with water quality.
