

The site plan illustrates the layout of the Llangollen Sewerage Treatment Works. Key features include:

- Existing Infrastructure:** Humus Tank 1, Humus Tank 2, Filter Bed 1, Filter Bed 2, Storm Tank 1, Storm Tank 2, Primary Settlement Tank 1, Primary Settlement Tank 2, Sludge Holding Tanks, and various pumping stations.
- Proposed Infrastructure:** New flow split weirs, distributor arms, and a new 'low head' unit for the filter beds. A new kiosk for the accumulator and washwater PS control panel is also shown.
- Access and Safety:** An existing access road and a kerline relocated to facilitate ferric sulphate delivery vehicle access are indicated.
- Other Features:** A decommissioned sludge drying beds area, a sludge digester, and a gully collection chamber are also shown.

The plan includes a scale bar (0 to 20m) and a north arrow pointing towards the top right.
