Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

A routine site inspection was undertaken on Friday 18th October 2019.

The following observations were made:

Waste Storage & Vehicle De-pollution

In a previous inspection the inspecting officer recorded a non-compliance as all liquids from vehicle de-pollution process were stored together. This is in conflict of the Hazardous Waste Regulations. During the inspection on 18/10/2019 waste fluids/liquids appeared to be stored separately. Containers for each material were clearly labelled.

Vehicle de-pollution equipment was viewed and there was no record of faults/breakdowns at the time of the inspection.

The end-of-life vehicle de-pollution unit appeared to be well maintained. There was no evidence of spillages/leaks and no pollutants appeared to be leaving the building.

No non-compliances were recorded during the inspection.

Thank you for your time during the inspection.
