### 4. Details of our assessment

Narberth Bridge CSO was visited on 21 March 2025.

The permit has an overflow setting of 37.9 litres per second.

*Please confirm if the asset is flow compliant and how many times did it spill in 2024? Could you also confirm whether or not the asset is on your list of frequent spillers that need attention.*

Please respond to these queries by 30 April 2025

Narberth Brook was viewed and appeared clear.

**Email received from DCWW 25 April 20205**

*At present there is no flow monitor on site so we are unable to assess flow compliance. This is a high spiller asset with 69 spills recorded in 2024. Due to this, this asset has been assessed under SOAF.*

To correct non-compliance, we may:

- require you to take specific actions

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.
