4. Details of our assessment

Audit summary

During a routine compliance assessment check that we have carried out on 08/04/2025 it was noted that the EDM operational time for this asset was less than the minimum of 90%. The operational time provided in the 2024 EDM Annual return for CB3199CH for Aberhondda Road CSO was 69.35%.

Condition 3.2.1 states that “The operator shall, unless otherwise agreed in writing by Natural Resources Wales, undertake the monitoring specified in the following tables in schedule 3 to this permit: (a) point source emissions specified in table S3.1 and table S3.4”

Guidance for scoring the non-operational time suggests that this may have had a Category 4: when the EDM is operational for 60.01-89.99% of the calendar year. It’s reasonably foreseeable that that there will be no environmental impact as the % indicates that the overflow is receiving reasonable monitoring and that the operator is likely to have reacted to any operational issues in a timely manner.

Action

- Please explain what action you will take to increase the EDM operational time to ensure compliance with the permit conditions by **30/06/2025**.
