4. Entitlement to apply (only required for abstraction licence applications)

Does the applicant have a legal right of access to the point of abstraction?

Has a right of access

☐

Has an expected right of access

☐

Owner/occupier of land

☒

Date these access rights are expected

For formal abstraction licence applications where you are the landowner/occupier, provide a map with the land boundary and all abstraction and discharge point(s) marked. Please tick here to show that you have done this. ☒

For expected rights of access, please also provide the additional evidence as outlined in Guidance Note WRX. Please tick here to show that you have done this. ☐

5. Application reference number

Have you undertaken a pre-application enquiry or had any previous discussions with us?

No ☐ Yes ☒ Provide reference number or staff member's name

8. Proposal summary

Please provide an outline of your proposal as described in Guidance Note WRX, including any sketches. If you are submitting a pre-application enquiry, this must include the quantities of water you propose to abstract. If necessary continue on a separate sheet and tick here to show that you have done this. ☒

Flow from the Afon Morlais has previously be diverted around to area that is now Ffos Las Racecourse as a result of mining activity and remediation. As part of the development of Ffos Las Racecourse, the channel of the Afon Morlais was restored through the racecourse, re-joining the river downstream of the racecourse. In restoring the Afon Morlais, an abstraction is required from the registered course of the river (through the diversion channel). The surface water source of the abstraction from the Afon Morlais is referred to as the "diversion channel" and the abstraction is routed through the "reinstated channel" to re-join the Afon Morlais downstream. The abstraction is achieved by a diversion weir structure designed to provide a flow split to both maintain flows in the restored channel and the diversion channel (see point B on supplementary map). During peak flows the majority of flow is routed through the diversion channel.

A flow splitting structure has been constructed to the specification detailed in the appended report Atkins Reference: 5029592-60-DG-03-2. The flow split is as follows:

- Up to Q_5 the split is 80% to the restored Afon Morlais channel and 20% to the diversion channel
- Above Q_5 , water will overtop the main weir and the majority of the water will flow down the diversion channel

Photographs of the structure are included in the appended document. Please note the adjustment plate on the diversion weir is a single plate rather than two plates, but performs exactly the same function.

Application Checklist

Please tick the following checklist items to indicate that you have included the required information. If any sections of the form are left blank and no supporting information submitted, where we have insufficient information to make a decision on your application, we will return your application to you.

Essential:

Letter of authorisation from the applicant, allowing the agent to act as signatory ☒

Map showing the land ownership boundary with all abstraction and discharge point(s) clearly marked ☒

Where relevant:

Evidence of negotiations of expected access rights, if applicable ☐

For groundwater abstractions, results of pump test (if not previously submitted) ☐

For Natural Resources Wales' use only:

Date received _____

Reference Number _____

Payment received Yes ☐ Amount received _____
No ☐ Not required ☐
