20th June 2012

Attention :-Rebecca Foster

Dear Madam,

I refer to the Agency's letters of November 2011 and January 2012 requesting me to register the septic tank at no. 48 Derwen Road and the treatment works at no. 50 Derwen Road. I also refer to our recent telephone conversations, to your subsequent e-mail of 13th June and to the EPCO.5 form, which you sent me last week. I enclose the completed form and have, under Item 1b, allocated a case reference no. GD/EA/100.

I confirm the following main points discussed :-

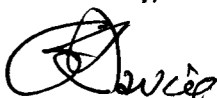

In the late 1980's, I purchased a plot of land (Plot 3) in Derwen Road and have subsequently built two houses (nos.48 &50) on the land.

No. 48 was built 20 years ago and has a septic tank system. Consent to Discharge was granted by the NRA (Welsh Region) on 5th September, 1989 (Reg. No. BP 0129401).

No. 50 was built recently and the small package treatment plant serves the whole house. Although the plant was installed prior to April 2010, the house is still unoccupied. No. 48 is up for sale and when sold, we will move into no. 50, which, though it can be three flats (A,B and C) we will initially (and probably for some time) occupy the whole house. Because the intended new house did not have a property number when I applied for a Consent to Discharge, I referred to " the proposed construction of a house on my land adjacent to my home at no. 48". As such, the EA Wales consent to Discharge (BP 0368101) of 16th November, 2007 refers to no. 48. After building the house, it was allocated a property no. 50. My application is to request that this consent be changed so as to refer to no. 50, instead of no. 48.

I appreciate the prompt and efficient attention you have given to this matter.

Yours truly,

Gareth Davies
