Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation was to add *10 01 15 bottom ash, slag, and boiler dust from co-incineration other than those mentioned in 10 01 14* to the Table S2.2 permitted waste code table within the permit.

We took the opportunity to amend the permit to include Table S2.1(Raw Materials) which had been left out of the permit in this last variation and therefore moved Table S2.1 (Waste) from previous variation (V005) to Table S2.2

No other changes were proposed or introduced as part of this variation.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number. .
