Proposal summary

Please provide an outline of your proposal, including any sketches. As a guide, you should include: a description of the activities which (will) take place at your site, the means of abstraction/impoundment proposed, if the proposal is related to another licence or permit (i.e. an Environmental Permit to Discharge Water) and details of any survey work undertaken. For changes to existing licences, summarise the changes proposed. Sketches or photographs that will aid our understanding of your proposal can be uploaded below.

The proposed licence variation is to amend the outfall location shown as point Q and the location of the five groundwater monitoring wells (A E) to the following positions.

Description Grid Reference

Point Q SH 61888 37858

Point A SH 62502 37976

Point B SH 62541 37947

Point C SH 62526 37904

Point D SH 62443 37835

Point E SH 62440 37913

These positions are broadly in line with the permitted locations detailed in the existing licence but have been changed slightly to reflect the asbuilt

locations. The site concerned is a wetland and the site

conditions prevented the wells being positioned exactly on the grid references prescribed in the original licence. The existing dwg in the current licence is still valid and still reflects the position of the above points schematically.
