Schedule

1. Air dispersion modelling assessment

Provide an addendum to the air dispersion modelling assessment which assesses the impacts of the facility on the Mynyddoedd Llangynidr a Llangatwg Cefn yr Ystrad a Chomin Merthyr (MLL) Site of Special Scientific Interest (SSSI).

This SSSI has been extended and its border is now approximately 160m from the centre of the proposed site and contains habitats that are sensitive to nitrogen and acid deposition. It is therefore necessary to have a quantitative assessment of the potential impacts of the proposed facility on this SSSI to aid our determination. Further information, including the extent of the MLL SSSI, can be found at this link: [Natural Resources Wales / Find protected areas of land and sea](#).

The assessment and report shall meet the requirements of the online gov.uk guidance: [Environmental Permitting: air dispersion modelling reports](#). To give a more accurate representation of the potential impacts, we recommend you carry out the assessment on the basis of the maximum operating hours in any one year of 2,250 hours.

End of Schedule.
