Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation and consolidation of an environmental permit.

This normal variation is for the addition of eleven emission points to air and thirteen new pieces of equipment on the roof due to changes in existing production processes. The variation will also bring the four existing boilers into regulation under the Medium Combustion Plant Directive.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
