

**Biogenie Remediation UK Ltd**

**Our ref: PAN-029968**

**Date: 28/08/2025**

Dear Mr Vickers,

**Confirming you may begin your deployment**

**Deployment ref: PAN-029968**

**Permit reference: EPR/AP3195FG**

**Permit holder: Biogenie Remediation UK Ltd**

**Location of the deployment: SWITCH Building, Harbour Side, Land North of Harbour Way, Harbour Side Regeneration Area, Port Talbot, SA13 1SB**

We've assessed your deployment application and agree that you may start to operate.

Your deployment activity should start within 12 months of the date of this letter. Should you not start the activity within 12 months you must contact us and may need complete another deployment application.

Your deployment lasts for one year from the date the activity starts; if you wish to continue the activity in excess of 12 months you must contact us and may need complete another deployment application.

You must comply with your permit and carry out the activities in accordance with the requirements of the agreed deployment application. The term 'deployment application' refers to the deployment form and all of the accompanying information. The accompanying information includes that which is sent in with the deployment form and any additional information received during the assessment.

If you want to change any of the details provided in the deployment form you must seek written permission from us before you change what you're doing.

Please remember that your deployment activity should not:

- be harmful to human health, or the quality of the environment,
- cause offence to human sense,
- result in damage to material property or
- impair or interfere with amenities or other legitimate uses of the environment or
- use processes which could endanger human health or harm the environment.
- breach any directly applicable legislation.

If you fail to comply with these requirements you may be committing an offence and enforcement action may be taken against you.

This approval letter is only to allow the mobile plant deployment in accordance with your environmental permit. As the operator, it's your responsibility to agree other authorisations, for example, planning permission, remedial strategy and objectives, abstraction or discharge consents with the relevant regulatory authority.

If operating a remediation activity; please note that operating under your mobile plant permit does not imply that the remediation processes used will be suitable for meeting any remediation objectives specified. These issues must be considered separately by the developer/consultant and our local area Geoscience team. These must be defined in the site remedial strategy which sets out the remediation options to reduce or control the risks from pollution linkages associated with the site as a whole. You may need to carry out further remediation if an unacceptable risk to the environment remains at the site.

Please notify NRW at least seven days prior to starting the activities. Your notification will be sent to the local area office team to the deployment site.

If you have any queries about this matter please contact us by telephone on 0300 065 3000 or email us at [enquiries@naturalresourceswales.gov.uk](mailto:enquiries@naturalresourceswales.gov.uk) quoting your deployment application reference.

Any work undertaken should take account of biosecurity risks, and mitigation measures should be put in place. The most important measure is to ensure that all equipment (plant, tools, footwear etc) that come to site, arrive clean, and are cleaned again before leaving site. This applies to all sites, not just those where an invasive non-native species (INNS), pest or disease has been previously identified. Information on how to assess biosecurity risks; simple steps to reduce risks; and specific measures for higher risk activities can be found on the [GBNNS website](#) for INNS, or for tree health on [our website](#). If you need any further help, please feel free to contact our [INNS and Biosecurity](#) team or our [Tree Health](#) team.

Yours sincerely

**Louise Bailey**  
**Permitting Officer**
