Letter and Description of Application to Transfer an Environmental Permit EPR/GP3397SH

Transferer & Current Permit Holder: C.T. Lewis Limited

Transferee & Proposed New Permit Holder: Perdue Recycling Limited

Dear Sir/Madam

**On behalf of C.T. Lewis Limited and Perdue Recycling Limited** please find below a description of this online application to transfer the **Environmental Permit EPR/GP3397SH** from CT Lewis Limited to Perdue Recycling Limited.

The Permit to be transferred is a Bespoke, Non-hazardous, Household, Commercial and Industrial Treatment and Transfer Station, which was issued in 2010 by Environment Agency Wales.

Waste Operations previously carried out at the facility by C.T. Lewis Limited were on a very small scale (less than 5,000 tonnes/year) and the site wastes have been cleared and waste activities have remained dormant / non-operational for the past several years.

The proposed new Permit holder; Perdue Recycling currently Operates a Standard Rules HCI Waste Transfer Station which is located very close by and approximately only 50 meters West along Kemys Way, this additional site will enable the newly proposed Operator, Perdue Recycling Limited to expand their existing waste transfer and treatment activities.

The changes to the proposed permit transfer apart from changing the existing Operator Company to the proposed new Operator Company are as follows:

During the determination period of the Transfer Application, Perdue Recycling Limited will be assessing their options, expansion of operations and upgrading the site infrastructure.

On completion of the proposed Transfer of the permit to Perdue Recycling Limited, the new Operator will be applying to vary the Permit to increase annual waste inputs and further expand the permitted site boundary & operational areas and to review and update their current management system to incorporate the revised operations before any new waste activities commence at the site.

A summary of the Management System is provided separately to this application as provided in the document; **Summary of Management System JG-CL-PR-Trans-App 1.2**

Continued;

**The Application consists of the following items and documents:**

-  Covering Letter and Description of Application JG-CL-PR Trans-App 1.2
