How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Natural Resources Wales (NRW) Waste Regulation Officer Mark O'GORMAN, Officer Carla CURTIS and officer Cerys PHILLIPS attended New Vale HWRC, Waun-y-Pound Industrial Estate, Ebbw Vale, Blaenau Gwent, NP23 6PL at 11:50am on Tuesday 12th August 2025 to conduct an unplanned site inspection of Permit site EPR-RP3895FN. The weather conditions were dry, clear and warm at the time of visit. The site was open at the time of the visit, fully operational and open to the public. NRW officers O'GORMAN, CURTIS and PHILLIPS met with the site supervisor, who showed them around the permitted area and explained operations and site procedures.

PERMIT INSPECTION

At the time of the inspection the site was fully operational and open to the public. Site security was good, with CCTV in operation and high fencing surrounding the perimeter. During the inspection NRW officers were shown and explained the waste disposal procedures and day to day operations of the site. All waste streams have separate, clearly signed storage containers, with no waste outside of any permitted area witnessed. Staff at site regularly check if user's waste is compliant and if it's being disposed of in the correct way. Staff were on hand to offer guidance and assistance for public users. Site staff were sorting and cleaning away debris throughout the working day to minimise litter and hazards. The site's drains were kept in a clean and tidy condition to prevent blockages and keep water flow efficient. NRW officers did not witness any offensive odours or excessive noises during the site inspection

Image 1 shows main yard with waste storage containers. The yard is in good condition and in a clean and

well-kept state with no storage containers overcapacity.

Image 2 shows staff cleaning the main yard to minimise litter and hazards.

Image 3 shows WEEE products kept appropriately under cover, inline with permit conditions.

Image 4 shows storage containers with correct waste products and kept in a tidy, non-overflowing state.

Image 5 shows car batteries kept in a safe manner, off of the ground within a container in line with permit conditions.

WAMITAB

Technically competent manager is Noel Chard and holds a current certificate at the time of the inspection.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

If your assessment result in Section 1 is suspended, what does this mean?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
