What is the project title?

Resubmission RML2559 - SOS Teaching and Research Programmes Grab Sampling

Briefly describe the low risk band 1 activities you will be carrying out.

For example:

Carrying out minor maintenance on a pier, including installing scaffolding, replacing bolts and decking, then removing scaffolding (construction activity example) Collecting twelve sediment samples from the sea bed (removal activity example) Depositing five marker buoys (deposit activity example) Brushing wind-blown sand back onto the beach where it came from (beach management activity example)

We wish to renew/update our annual licence to undertake routine teaching and research activities. SCIENTIFIC RESEARCH EDUCATION (Undergraduate and Postgraduate studies). To teach and demonstrate various sediment and benthic sampling techniques (see method statement) then analyse samples at the labs in Menai Bridge for environmental impact assessment/population surveys/grain size analysis and sediment mechanics. The sampling will predominantly take place within the water bodies of North Anglesey and North Wales. However, depending on student projects some samples may also be collected/required from the Skerries, Caernarfon Bay North or the Menai Strait area.

The sampling work will be undertaken using Bangor University vessels 'Prince Madog', 'Macoma' or 'Mya' and will predominantly take place between September and December with occasional trips for postgraduate project work occurring throughout the rest of the year.

The average sample size will be less than 0.002 M³ (2ltrs) in volume (see method statement for full details).

When do you want the licence to start?

Band 1 licences are typically issued for one year, subject to consultation.

Make sure the date you provide is on or before the day you want to start carrying out the work.
