

# Apply to renew or change an abstraction or impoundment licence

## Type of variation/renewal

Indicate the change(s) you wish to make to your licence(s) here.

Same terms renewal (where no environmental or other concerns have been raised in your renewal reminder letter)

## The licence(s) you want to change/renew

Provide the licence serial number(s) which the proposed change/renewal relates to

WA/061/0006/002

-

-

## Application fee

Please indicate how you wish to pay your application fee. If paying by BACS, please quote the reference number created when setting up the bank transfer.

If paying by cheque, please ensure you add the six digit cheque number below.

BACS

Please add your BACS reference below

WRRVALEROENE2401

Is this proposal as a result of a Restoring Sustainable Abstraction programme or other work remediation work, to prevent and reduce environmental damage requested by us?

No

Are you making this application as part of an agreement to trade water rights? Water rights trading is where a Licence Holder sells all or part of their abstraction licence rights, permanently or temporarily, to another person.

No

Provide details below

Same terms renewal

## Existing Licence Holder details

Provide details of the existing Licence Holder.

Specify who we should contact with regard to

|                              | Applicant | Agent |
|------------------------------|-----------|-------|
| Operations (on site) contact |           | X     |
| Invoice contact              |           | X     |
|                              |           |       |

## Details of individual authorised to act as abstraction records (returns) contact

Specify who we should contact regarding abstraction records (returns)

Existing returns contact

Are you applying to apportion your licence? Find an explanation of apportionment on our website.

No

Are you applying for a simple change?

No

## Same terms renewal

Are you applying for a same terms renewal?

Yes

Use this section to show us how you have calculated the amount of water you require. This should include details of your operational regime (for example, number of hours and days you intend to abstract, number of units produced or area to be irrigated). We use this information to determine if the volumes you propose to abstract are appropriate for the purpose. Depending which industry you are in, you may need to provide additional information below.

If your water usage has been lower than your licensed volumes, you will need to provide additional information to demonstrate your continued need for the water, for example, additional justification or a Business Case.

Abstracted water is utilised to hydraulically test storage tanks before returning them to service following inspection and maintenance. Storage tank inspection and maintenance frequency is determined by floor corrosion rate. On average eight storage tanks per year are hydraulically tested, ranging in size from 2,000 m<sup>3</sup> to 87,000 m<sup>3</sup>. All abstracted water is returned unaltered to the abstraction source, i.e., the Milford Haven waterway.

### For industrial use

| Industry sector or process type | Water use per unit produced (state units) | Maximum units produced per year |
|---------------------------------|---|---------------------------------|
| Refining mineral oils           | 0.017 m3/m3                               | 15668198 m3                     |
| -                               | -   | -                               |
| -                               | -   | -                               |
| -                               | -   | -                               |

Provide details of what measures you provide to ensure efficient use of water. This could include water storage, re-use or recirculation, monitoring and checking for leaks, undertaking water audits or other industry specific good practise.

Water is abstracted utilising a dedicated, above ground pipeline which is monitored for leaks on a daily basis by Operations and Maintenance personnel. Where possible abstracted water is reused for subsequent hydraulic testing by direct transfer between storage tanks. All abstracted water is returned unaltered to the abstraction source.

### Different terms renewal

Are you applying for a different terms renewal

No

### Signatures: existing Licence Holder (for all changes), and proposed Licence Holder(s) for Transfers and Apportionments

Existing Licence Holder's signature

**Full Name** Mark Phair
