27th September 2024

Dear Ms Parr,

**RE: PPC Permit MP3036SS, Variation LP3630MR – Whitehall Landfill
Quarterly Review Report – condition 4.2.2**

As required by the condition 4.2.2, this review of monitoring data covers the quarter commencing 17th June 2024.

Results of the monitoring conducted in this quarter are presented in the attached spreadsheet.

There was one breach of the ammoniacal nitrogen limits at BH1 in July. A schedule 6 report was not sent at the time as we had asked the technician to repeat the sampling in August. The August result subsequently confirmed the July breach.

Graphs of carbon dioxide have been made available for the perimeter gas wells.

No significant amounts of methane were detected in the perimeter gas monitoring.

Gas data has also been provided for the in waste gas locations (GF01 to GF11).

Should you have any further questions regarding this matter, please do not hesitate to contact me.

Yours sincerely,

☎ 01932 583644
