Subject: Authorisation to sign permit application

Dear Terry,

As you know, I am working with EQO on the demolition and remediation of the Bridgend site. Ford is completing an Natural Resource Wales permit application in order to discharge potentially impacted groundwater (with very low concentrations of some contaminants that we used on-site) back to the ground at the Bridgend site during the removal of the SIGMA Basement. The permit application requires the signature of a director of the company or, written authorisation from a director of the company that a nominee of their choice can sign the application on their behalf.

In order to fulfil this requirement, please could you confirm in writing (via return email) that you give your authorisation for me to sign the application on your behalf.

Thanks in advance.
