The Facility	Gas Cylinder Storage Facility
The Schedule 5	Schedule 5 notice, reference PAN-026369 Schedule 5 Re-Issue
UKHSA	UK Health Security Agency
VOCs	Volatile Organic Compounds

1. SITE DETAILS

1.1. Context and Objectives of Application Site Condition Report

- 1.1.1. Environmental Compliance Limited (“ECL”) has been commissioned by Mr Victor Keseru, trading as Envik Waste Recycling Services (“Envik Waste”) to produce an Application Site Condition Report (“ASCR”) to form part of the bespoke waste operation Environmental Permit (“EP”) application for their proposed gas cylinder storage Facility, hereafter referred to as “the Facility” or “the Site”.
- 1.1.2. This ASCR report has been prepared in accordance with Version 5 of the Natural Resources Wales (“NRW”) H5 guidance document ‘Guidance for applicants H5, Site condition report and template’.¹
- 1.1.3. This version of the ASCR (Issue 3, September 2025) has been amended with regard to the Schedule 5 notice, reference PAN-026369 Schedule 5 Re-Issue, (“the Schedule 5”) which was issued by Natural Resources Wales (“NRW”) on the 3rd September 2025. It is noted that changes to the text between Issues 1 and 2 (resultant from the previous Schedule 5 response Ref PAN-026369 Schedule 5 Notice for Further Information dated 10 June 2025) have also been updated.
- 1.1.4. The aim of the ASCR is to describe the condition of the land at the site and, in particular, to identify any substance in, on, or under the land that may present a pollution risk.
- 1.1.5. The ASCR, therefore, sets out the initial (i.e., current) environmental condition of the site and takes into account any pollution incidents that may have occurred at the site and details of any measures put into place to mitigate the effects of any such incidents. It serves two main purposes:
- firstly, it will act as a reference point, along with operating records, for measuring any deterioration of the site whilst operating under the permit (on surrender of the permit, another site report must be prepared, identifying any changes to the condition of the site from that described in the original report); and
 - secondly, the ASCR will give information on the physical attributes and vulnerability of the site; it will assist in understanding the environmental setting of the site, and understanding the nature, extent and behaviour of any contaminants that may be present; local hydrology, hydrogeology, geology and general setting are taken into account.

1.2. Name of the Applicant

- 1.2.1. The applicant is Mr Victor Keseru (an individual applicant) who is trading as Envik Waste Recycling Services.
- 1.2.2. The sole waste activity to be undertaken is the acceptance of gas cylinders and cannisters, comprising propane, butane or a mixture of both, which are to be stored at the Facility prior to treatment and recovery of the components.

¹Natural Resources Wales ‘Guidance for applicants H5, Site condition report and template’, available at: <https://cdn.cyfoethnaturiol.cymru/media/1215/environmental-permitting-regulations-guidance-for-applicants-h5-site-condition-report-guidance-and-template.pdf>, updated October 2014, accessed April 2024.

1.2.3. Any cylinders accepted which are the legal property of a company, for example BOC or Flogas, remain the property of that company and will be removed from site and returned to the registered company.

1.3. Site Location

1.3.1. The Facility is located on Westside, Cambrian Industrial Estate, Coedcae Lane, Pontyclun, CF72 9EX. The Facility is centred on the Ordnance Survey (“OS”) National Grid Reference (“NGR”) 302691, 182150 and occupies an area of approximately 300m².

1.3.2. The Site Location Plan (Drawing Reference ENVK.01.01-01) details the proposed Environmental Permit (“EP”) boundary and is provided in Appendix I of this document.

1.3.3. The following drawings have been prepared for the EP submission and are included in Appendix I of this ASCR:

- Site Location Plan – ENVK.01.01-01; and
- Site Layout Plan – ENVK.01.01-02 vs 2.

1.3.4. Figure 1 provides the indicative location of the Installation (red outline) as well as the surrounding land uses.

Figure 1: Indicative Site Location

1.3.5. The Facility is located within an industrial estate with a mix of industrial and commercial use. Surrounding industrial units and storage containers are located off Coedcae Lane to the west, east and north of the Facility’s EP boundary.

1.3.6. The industrial and commercial premises in the immediate surroundings include groundwork contractors, garages and builders merchants.

1.3.7. The A473 is located approximately 340m northeast from the Facility’s EP boundary. A

railway line lies approximately 13m south of the Facility.

- 1.3.8. The nearest residential property is located approximately 312m southeast from the Facility's EP boundary at its nearest point.

2. CONDITION OF LAND AT PERMIT ISSUE

2.1. Geology

- 2.1.1. The British Geological Survey (“BGS”)² records the bedrock as South Wales Middle Coal Measures Formation – comprising of mudstone, siltstone and sandstone. This sedimentary bedrock was formed between 318 and 309.5 million years ago (“Ma”) during the Carboniferous period.
- 2.1.2. The BGS superficial deposits are alluvium, comprising of clay, silt, sand and gravel. Sedimentary superficial deposit formed between 11.8 thousand years ago and the present during the Quaternary.
- 2.1.3. The Facility is located within the Coal Mining Reporting Area according to The Coal Authority interactive map and data sets contain recorded coal mining related features³. However, due to the proposed waste activities (enclosed above ground storage) and existence and extent of the existing impermeable surfacing, further consideration is not deemed to be required.
- 2.1.4. According to the Radon Affected Area mapping tool⁴ for the UK produced by the UK Health Security Agency (“UKHSA”), the Facility is located within an area with bands of elevated radon potential possessing a maximum radon potential of 10-30%. No excavation or below ground storage is proposed, therefore, further consideration is not deemed to be required.

2.2. Hydrogeological

- 2.2.1. The bedrock geology is reported to be a ‘Secondary A’ Aquifer, defined as permeable layers that can support local water supplies, and may form an important source of base flow to rivers.
- 2.2.2. Superficial drift deposits underlying the Facility are also designated as a ‘Secondary A Aquifer’.
- 2.2.3. There are four groundwater abstraction licences within 2km of the Facility as shown in Table 1.

² British Geological Survey Geology of Britain Viewer. Available online at <https://www.bgs.ac.uk/map-viewers/geology-of-britain-viewer/>, accessed April 2024.

³ The Coal Authority. Interactive Map. Available online at <https://mapapps2.bgs.ac.uk/coalauthority/home.html> accessed April 2024.

⁴ UKHSA. Radon Affected Areas Mapping Tool. Available online at <https://www.ukradon.org/information/ukmaps>, accessed April 2024.

Table 1: Groundwater Abstraction Licences Within 2km of the Facility

NGR	Licence Number	Distance from Site (km)	Details of Use
303020 181000	21/57/31/0009	1.181	Breweries/Wine: General Use (Medium Loss)
304000 182375	21/57/31/0059	1.316	Chemicals – Non-Evaporative Cooling
304000 182380	21/57/31/0057	1.317	General Industry
300810 182650	21/57/31/0037	1.937	General Industry

2.2.4. From review of the Source Protection Zone (SPZ) Merged online database⁵, the Facility is not located within a Source Protection Zone.

2.3. Surface Waters

2.3.1. Nant Melyn stream is located approximately 0.04km southwest of the Facility's EP boundary, which flows into the River Ely. The River Ely is approximately 740m east at its closest point to the Facility's EP boundary.

2.3.2. As shown on the NRW's Flood and Coastal Erosion Risk Maps⁶ reproduced in Figure 2, the Facility is not categorised as being at risk of flooding from rivers and seas and surface water and small water courses.

⁵SPZ Merged DataMapWales. Available online at: https://datamap.gov.wales/layers/inspire-nrw:NRW_Source_Protection_Zones, accessed April 2024

⁶NRW Flood and Coastal Erosion Risk Maps, available at: <https://flood-risk-maps.naturalresources.wales/?locale=en>, accessed April 2024.

Figure 2: NRW Flood Risk Map

2.3.3. There are no surface water abstraction licences within 2km of the Facility.

2.4. Pollution History

2.4.1. Historic and Existing Activities

2.4.1.1. A review of the OS maps from 1876 to 2024 has been undertaken for the Facility and surrounding area and the findings are presented in Table 2.

2.4.1.2. The OS maps are contained within the Envirocheck Report which is provided in Appendix II of this ASCR.

2.4.1.3. It is not the purpose of this section to provide a comprehensive account of development history but only to detail those factors that are or could be relevant to the potentially contaminative history of the site and surroundings.

Table 2: Historical Review

Date	Scale	The Facility	Surrounding Area
1876-1885	1:2,500 & 10,560	Rough pasture	Railway line runs northwest to southeast 12m southwest from the Facility. Cynllywn woodland is situated 20m on the other side of the railway line.
			Several residential buildings located approx. 340m and 370m southeast from the Facility.
			Chalybeate Spring is located approx. 379m southeast of the Facility.
1899-1900	1:2,500 & 10,560	No change	Colliery located approx. 425m east of the Facility
			Sanitary Pipe and Brick Works located 30m east of the Facility. Expansion of the railway to include sidings into the Works. External kilns also located at the Works. Glamorgan Joinery Works and Cambrian Engine Works located approx. 180m and 365m southeast respectively. Llantrisant Tin Plate Works located 750m southeast.
1919-1921	1: 10,560 & 1:2,500	No change	Old Sand Pit and Old Coal Pit located approx. 640m and 950m southeast respectively.
			Expansion of railway network around Pontyclun 545m southeast. Gas Works located approx. 540m southeast and Ely Joinery located approx. 870m southeast.
1947-1953	1:10,560	No change	Residential expansion of Pontyclun approx. 1km southeast of the Facility.
			Sanitary Pipe and Brick Works and its infrastructure located 30m east of the Facility is removed.
			Further residential expansion of Pontyclun approx. 1km southeast of the Facility.

Table 2: Historical Review (Cont.)

Date	Scale	The Facility	Surrounding Area
1947-1953	1:10,560	No change	Sanitary Pipe and Brick Works and its infrastructure located 30m east of the Facility is removed. Further residential expansion of Pontyclun approx. 1km southeast of the Facility.
1961-1965	1: 10,000 & 1:2,500	No change, area noted to be vegetated with trees.	Industrial expansion off Coedcae Lane with more works noted either side. Works occupy the land where the Colliery was situated 425m east of the Facility. A drain is noted approx. 60m northeast of the Facility.
1970-1975	1: 10,000 & 1:2,500	No change	Development of roads off Coedcae Lane approx. 60m from the Facility. Hume Works denoted approx. 130m east of the Facility. Works 425m east of the Facility now removed altogether. Large industrial unit constructed approx. 455m north-northwest from the Facility. Residential expansion approx. 392m southeast of the Facility along Tyle Garw. Iron and Aluminium Foundry noted approx. 421m and 762m southeast respectively.
1979-1990	1: 10,000 & 1:2,500	The Facility is shown to be surfaced with hardstanding post 1986. Fully incorporated into the Industrial Estate.	Scrap Yard located approx. 60m southeast from the Facility. Works constructed approx. 100m northwest from the Facility including tanks and hoppers. Sewage Works constructed approx. 210m northwest from the Facility. Large expansion of the industrial estate approximately 200m north of the Facility, now named Coedcae Industrial Estate.
1993	1: 10,000 & 1:2,500	No change	Major residential development in the areas of Pontyclun and Talbot Green approx. 583m east to its nearest point to the Facility. Roundabouts constructed where A473 is noted today approx. 470m and 690m northeast of the Facility.
1996-1999	1: 10,000 & 1:2,500	No change	Residential development on Ash Grove 425m southeast of the Facility.

Table 2: Historical Review (Cont.)

Date	Scale	The Facility	Surrounding Area
2024	1: 10,000	The Facility as operating today	Extension of residential property on Ash Grove approx. 425m southeast from the Facility. Buildings illustrated 47m north and 52m west-northwest of the Facility.

2.5. Pollution Incidents

2.5.1. The Envirocheck report contained in Appendix II lists six recorded pollution incidents to controlled waters within 500m of the EP boundary with the most recent recorded in 1996. The incidents have been listed in Table 3.

Table 3: Recorded Pollution Incidents within 500m of the Facility

NGR	Date of Incident	Pollution Description	Distance from Site (m)	Incident Severity
302950 181950	10.02.1995	Oils - Diesel (Including Agricultural)	318	Category 3 – Minor Incident
302950 181945	10.02.1995	Mud/Clay/Soil	321	Category 3 – Minor Incident
303000 181900	23.08.1995	Sewage - Treated Effluent	388	Category 3 – Minor Incident
302900 181800	01.07.1996	Crude Sewage	394	Category 3 – Minor Incident
302900 181795	01.07.1996	Crude Sewage	399	Category 3 – Minor Incident
303200 182200	18.10.1996	Oils - Diesel (Including Agricultural)	500	Category 3 – Minor Incident

2.5.2. There were also fifteen recorded pollution incidents greater than 500m in distance from the Facility, these involved light oil, petrol, crude sewage, algae, foam and soap suds, mud/clay/soil and mining water. These incidents all occurred between 1991 and 1997.

2.5.3. The following potential sources of contamination were identified from the historic map review (see Section 2.4.1 of this document) and recorded pollution incident review.

2.5.4. On-Site Potential Pollution Impacts

2.5.4.1. As identified using the historical OS maps, post 1986 the area is shown to be hard surfaced and formed part of the industrial estate. Prior to this, the area was noted as rough pasture/vegetated land.

- 2.5.4.2. From anecdotal evidence, prior to Envik Waste’s occupancy, the site was historically used as a storage area for transport, plant and equipment within the industrial estate.
- 2.5.5. Potential on-site pollution may have occurred from localised minor spillages associated with this historic use. However, it is likely that impermeable surfacing will have prevented any significant contamination of land or controlled waters. It should be noted that no recorded pollution incidents were identified on site within the Envirocheck Report.
- 2.5.6. Off-site Potential Pollution Impacts
- 2.5.6.1. As identified using the OS maps, the Facility was historically surrounded by rough pasture, a railway line and industrial premises.
- 2.5.6.2. Of particular note, due to the proximity to the Facility, potential widespread contaminants associated with railways can include:
- polycyclic aromatic hydrocarbons (“PAHs”);
 - potentially toxic elements (“PTEs”);
 - polychlorinated biphenyls (“PCBs”); and
 - hydrocarbons/oil derived substances.
- 2.5.6.3. As the Facility is located within a coal mining area, potential widespread contaminants associated with collieries can include:
- PAHs; and;
 - heavy metals including aluminium, arsenic, copper, iron, lead, nickel and zinc.
- 2.5.6.4. Operations of waste management facilities within 500m include:
- Vehicle Depollution Facility;
 - Waste Electrical and Electronic Equipment (“WEEE”) Treatment Facility; and
 - Household Commercial and Industrial (“HCI”) Waste Transfer Station.
- 2.5.6.5. Potential widespread contaminants associated with the waste management include:
- rubble/litter or solids;
 - persistent organic pollutants (“POP”);
 - PAHs; and
 - heavy metals.
- 2.5.6.6. However, the last recorded pollution incident occurred in 1997, approximately 1km from the Facility.

2.6. Pollution Prevention Measures

- 2.6.1. Full details of the pollution prevention measures in place at the Facility are provided in the Environmental Permitting Technical Report (“EPTR”) provided with this application.

- 2.6.2. The storage, treatment and quarantine areas benefit from impermeable surfacing. The facility is isolated from the drainage system. The incoming wastes will be stored on impermeable surfacing with drainage containment measures in place, compliant with the requirements of the Guidance for the storage and treatment of aerosol canisters and similar packaged wastes – An addendum to Sector Guidance Note IPPC S5.06 (“the Guidance”)⁷.
- 2.6.3. The incoming waste canisters will be stored in secure, lidded-containers which are able to retain free liquid and in addition benefit from being stored on drip trays which afford additional containment. The drip trays will be regularly inspected and emptied of any collected rainwater (pumped to tanker for disposal at a suitably permitted facility) as required.
- 2.6.4. The storage tanks for any liquified gas removed during the treatment process will conform to the UK LPG Codes of Practice 01, Parts 1 and 2⁸ and in addition to British Standard PD 5500 CAT 2.⁹ and will be bunded.
- 2.6.5. The impermeable surfacing and containment measures in place prevent a pollution pathway and ensure no downward migration of potentially polluting substances entering the ground or groundwater.
- 2.6.6. There are no point source emissions to surface water or sewer proposed as part of the proposed activities.
- 2.6.7. The piercing gas canister treatment equipment is contained and therefore, there is no risk of spillage of residual liquid from the nominally empty cannisters being treated.
- 2.6.8. Envik Waste will have in place a Planned Preventative Maintenance Program (“PPMR”), which will be appended to the Environmental Management System (“EMS”) and will include inspections of:
- condition and integrity of the impermeable surfacing;
 - condition and integrity of storage containers and skips;
 - condition and integrity testing of equipment, pipework and tanks; and
 - condition and integrity of the site buildings, fences and gates.
- 2.6.9. The EMS, including the PPMR, will be in place within 1 month of the permit being issued.
- 2.6.10. A spill kit containing absorbent mats will be located at the Facility which can be deployed in the event of a spill on site from vehicles.

2.7. Site Walkover Survey

- 2.7.1. The proposed EP boundary is illustrated as the green outline on the Site Location Plan (ENVK.01.01-01) which is contained in Appendix I of this ASCR. A site walkover survey was undertaken on 11th April 2024 by ECL and Envik Waste personnel. The condition of the

⁷ <https://assets.publishing.service.gov.uk/media/5a74b898e5274a3f93b48440/geho1111bved-e-e.pdf>

⁸ <https://www.liquidgasuk.org/uploads/DOC65F1825C7F50A.pdf>

⁹ <https://knowledge.bsigroup.com/products/pd-5500-2021-a2-2022-specification-for-unfired-pressure-vessels>

concrete surfacing is considered to be in generally good condition showing no signs of significant cracks or depressions.

2.8. Requirement for Intrusive Site Investigation

- 2.8.1. The extent and condition of the site infrastructure, in particular the impermeable concrete surfacing and containment measures, will prevent any contamination from occurring as a result of the proposed activities.
- 2.8.2. There will be no emissions to surface water or sewer associated with the proposed activities.
- 2.8.3. All waste will not be stored directly onto the surfacing but will be held within containers.
- 2.8.4. Furthermore, undertaking an intrusive investigation would require drilling through the site surfacing which would create pollution pathways and could also affect the integrity of the surrounding concrete.
- 2.8.5. Consequently, intrusive site investigation is not considered to be necessary in this case due to the presence of the impermeable surfacing, lack of potential polluting substances on site and the nature of the proposed activities.

3. PERMITTED ACTIVITIES

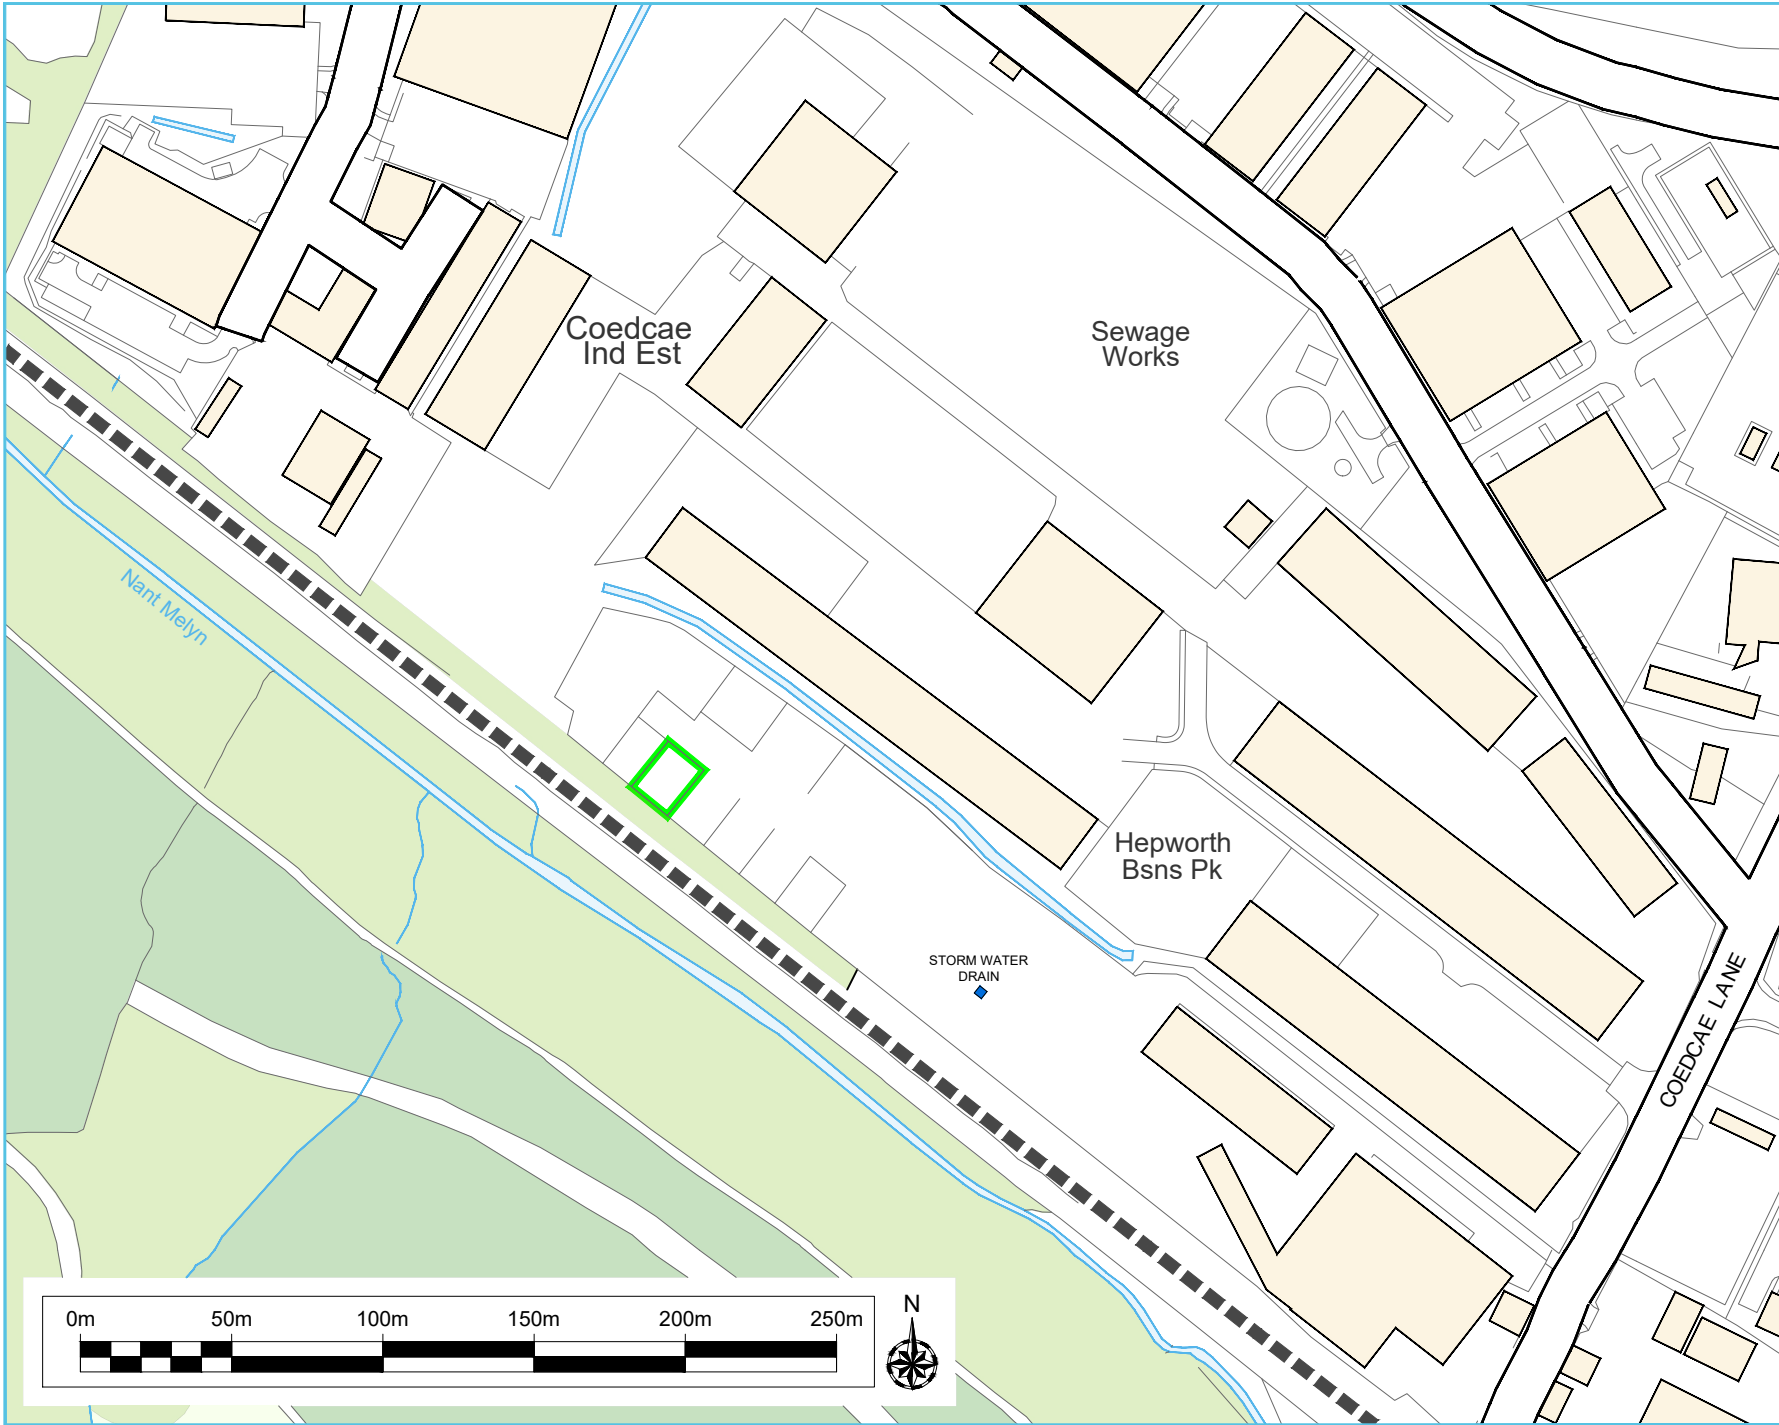

3.1. Permitted Activities

- 3.1.1. Due to the proposed activities, Envik Waste is applying for an Environmental Permit to operate a Facility falling under Schedule 9 Part 1 of the Environmental Permitting (England and Wales) Regulations 2016 (as amended).
- 3.1.2. The waste management operation to be carried out at the site as specified in Annex I of the Waste Framework Directive 2008 is detailed below:
- **R3:** Recycling/reclamation of organic substances which are not used as solvents (including composting and other biological transformation processes)
 - **R4:** Recycling/reclamation of metals and metal compounds;
 - **R13:** Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced); and
 - **D15:** Storage pending any of the operations numbered D1 to D14 (excluding temporary storage, pending collection, on the site where it is produced).
- 3.1.3. A Site Layout Plan (ENVK.01.01-02 vs2) has been produced illustrating the proposed activity layout and is provided in Appendix I of this ASCR.
- 3.1.4. An Environmental Risk Assessment (“ERA”) (ENVK.01.01/ERA (Issue 4)) has been prepared for this Environmental Permit application submission. Additionally, an Accident Management Plan (“AMP”) will be prepared as part of the EMS and will be available within 1 month of the issue of the permit.

Glamorganshire

Published 1884 - 1885

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 1999

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Site Details

Site at 302690, 182150

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

Slice

Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

Segment

A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

Quadrant

A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

A selection of organisations who provide data within this report:

Envirocheck reports are compiled from 136 different sources of data.
