### 1. Summary of our findings (full details in section 4)

Part of permitted activity assessed (compliance criteria)	Assessment result	Permit condition
IR2C - Installations - Operations - Operating techniques	C4 No impact	1.1.1 The operator shall manage and operate the activities: (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non conformances, closure and those drawn to the attention of the operator as a result of complaints;
IR2C - Installations - Operations - Operating techniques	Action only (X)	
IR3B - Installations - Emissions and monitoring - Emissions of substances not controlled by emission limits	C4 No impact	3.2.1 Emissions of substances not controlled by emission limits (excluding odour)

Part of permitted activity assessed (compliance criteria)	Assessment result	Permit condition
		shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

Result types are explained in more detail in the 'Important Information' section below.

Total non-compliances recorded	Total non-compliance score
2	0.2

How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

## 2. What action is required?

Criteria	Action needed	Complete by
IR2C	Complete PAT testing for the site and provide a certificate to demonstrate this has taken place	01/12/2025
IR2C	Ensure site risk assessments are reviewed and signed off each year, as part of H2S "best practice"	01/12/2025
IR3B	Repair the cracked roof fan cover on shed 9 to reduce the likelihood of rainwater entering the shed and compromising the litter	28/12/2025

Compliance criteria codes are listed in the 'Important information' section below.

## 3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

## 4. Details of our assessment

Gernant poultry unit was visited on 27th August 2025.

**Condition 1.1 - General Management**

1.1.1 (a) - PAT testing was out of date, and this need to be addressed to minimise the risk of electrical failure

**Action:** Complete PAT testing for the site and provide a certificate to demonstrate this has taken place by **December 1st 2025**

1.1.1 (a) - While risk assessments were present, they had not been reviewed for a few years which is not in line with the operators own "best practice" principle of annual review

**Action:** Improve control of risk assessment documents

**Condition 3.2 - Emissions of substances not controlled by emission limits**

3.2.1 - Shed 9 had a damaged roof fan cover, which could allow rainwater to enter the shed, compromising the quality of the litter and producing excess waste

**Action:** Repair the damaged roof fan cover on shed 9 by **December 28th 2025**

**Summary**

Overall the site was well maintained, with improvements made to the yard concrete since the previous inspection. This is an improvement from the previous inspection.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

## Important information

### Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

### Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

### How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

**If your assessment result in Section 1 is suspended, what does this mean?**

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
