9 December 2025

Dear permit holder,

Changes to Natural Resources Wales Standard Rule Permit

Permit reference: EPR/AB3091ZZ

Permit holder: Mr Edward Vaughan, Mr John Vaughan and Mrs Eluned Beryl Vaughan

Facility reference: Sychtyn

Rule set held: SR2012 No10: On-farm anaerobic digestion using farm wastes only,
including use of the resultant biogas

What's happening?

Following our Standard Rule Permit (SRP) consultation held from 10 July to 10 October 2025 we have made changes to the SRP (environmental permit) you hold.

The amended SRP is available on our website. As an existing permit holder of the affected permit the amended conditions come into effect three months from the publication date, 11 December 2025.

The new version of SRP, SR2012 No10: On-farm anaerobic digestions facility using farm wastes only, including use of the resultant biogas can be found on the Natural Resources Website from the link below.

What do you need to do?

You need to look at the SRP and accompanying generic risk assessment on our website to ensure you can comply with the conditions and requirements.

Look at our '*Response to consultation on proposed changes to standard rule permits*' document on our website for more information about the changes to your SRP.

What if I *can* comply with the new conditions?

If you can comply (carry out your activity) in line with the new conditions, you need to:

- Go to our website any time and download the SRP and accompanying generic risk assessment
- Make sure that you are operating in line with the SRP

What if I *can't* comply with the new conditions?

If you know, or are not sure, whether you can comply with the new conditions, **please talk to your compliance officer as soon as possible.**

You may need a bespoke environmental permit. There is more information on how to get this on our website. We can also offer you help as part of our pre-application advice service.

Please remember, it is your responsibility to make sure you have the right type of permit for your activity.

For copies for the SRP and accompanying generic risk assessments please visit

[Natural Resources Wales / Waste standard rules not available to apply for](#)

For further information, please contact your site compliance officer.

In the future, we would like to send you correspondence about your permit to you via email. Please send us a contact email address along with your permit reference to permittingconsultations@cyfoethnaturiolcymru.gov.uk

Yours sincerely,

David Willey
