## Same terms renewal

Are you applying for a same terms renewal?

Yes

Use this section to show us how you have calculated the amount of water you require. This should include details of your operational regime (for example, number of hours and days you intend to abstract, number of units produced or area to be irrigated). We use this information to determine if the volumes you propose to abstract are appropriate for the purpose. Depending which industry you are in, you may need to provide additional information below.

If your water usage has been lower than your licensed volumes, you will need to provide additional information to demonstrate your continued need for the water, for example, additional justification or a Business Case.

As advised by the Water Resources Permitting Team rather than providing the same information as the original application, we confirm that the details of the hydroelectric scheme remain the same as the original application.

There have been some improvements in a fish pass on a section of the depleted reach just downstream from an old road culvert. This work was requested by NRW during a compliance visit in September 2017, works were inspected and approved by NRW during a compliance visit during August 2018.

Nothing else has changed.

Please note that since the original application the business address of Ffwddog Estate Limited has changed from Court House Farm (as detailed on the original abstraction licence) to Holbury House (as used in this form). Ffwddog Estate Limited remains the owner of the licence, and Iain Paterson (Director of FELtd) remains the main contact point.

Annual abstraction returns have been submitted through the NRW returns portal up to the end of March 2025. Data for the March 2026 return is being collected and will be uploaded in April 2026.

Provide details of what measures you provide to ensure efficient use of water. This could include water storage, re-use or recirculation, monitoring and checking for leaks, undertaking water audits or other industry specific good practise.

The details of the hydroelectric scheme remain the same as the original application. Nothing has changed.

Intake, pipework, fish passes, outfall, control systems, etc... are regularly checked to ensure efficient use of water and operation of the scheme.
